

**MEXICO TRADE MISSION TO
VERACRUZ AND GUADALAJARA
(October 15-21, 2006)**

Mexico is the second largest single country market for Iowa exports, capturing 14 percent of the exports in 2005. Mexico is a natural market because of the tremendous receptivity it extends to U.S. suppliers. However it can be difficult to capitalize upon its full potential due to issues such as its size and diversity, legal and banking systems, regulations and standards, and language and culture.

Guadalajara is Mexico's second largest city and third largest manufacturing base. The state of Veracruz, along the Gulf Coast, is the third largest Mexican state in population and the fifth largest in manufacturing production. It is also a large agricultural producer and oil extractor.

One-on-one pre-qualified appointments will be arranged in one or both locations for participating companies whether they are seeking to develop or expand direct export sales, locate distributors or agents, conduct market research or have other goals. All manufacturing industry sectors are invited to participate in this mission, although opportunities in Veracruz are limited to certain sectors. The deadline to submit the trade mission application is August 15, 2006.

EDUCATION

EXPORT/IMPORT COMPLIANCE SEMINARS (November 8-9)

A central Iowa location is currently being finalized for fall seminars focusing one full day on export compliance and a second day on import compliance. U.S. exporters and importers are liable for compliance with all applicable laws and regulations. Many companies attempt to rely on third parties, such as their freight forwarders and customs brokers, to meet compliance requirements. However third parties are typically not familiar enough with your products, customers and partners to recognize potential "red flags." Liability for compliance cannot be outsourced. Government enforcement and penalties continue to increase. Optional programs such as Export Management Systems and Customs-Trade Partnership Against Terrorism are highly encouraged. Proper record keeping is essential.

UCP 600 SEMINAR – CEDAR RAPIDS (March/April 2007)

The Uniform Customs and Practice for Documentary Credits (UCP), which is produced by the *International Chamber of Commerce (ICC)*, is an international set of rules governing the rights and obligations of traders and banks under Letters of Credit. It is anticipated that the ICC will release an update, *UCP 600*, by year end which will become effective July 1, 2007. Everyone involved in Letters of Credit, including banks, exporters, importers, forwarders, etc., will be affected by these changes.
